Sligo, Ireland | +353 89 942 7163 | hubertkaminski2005@gmail.com | linkedin.com/in/hubert-Kaminski

PROFILE

Mechanical Engineering student (BEng Hons, ATU Sligo) with hands-on experience across mechanical design, structural simulation, prototyping, electronics, and technical computing. Proficient in CATIA V5 and SolidWorks, validating designs with structural FEA in ANSYS and Abaqus. Extensive practical 3D printing across FDM and resin processes, using my own printers and daily in industry.

LANGUAGES

English (Native/Bilingual) | Polish (Native/Bilingual) | French (A2) | German (A2)

EDUCATION

BEng (Hons) Mechanical Engineering | Atlantic Technological University (ATU) Sligo, Ireland 2024 – Present

- Enrolled full-time. Core areas: mechanical design and CAD, structural analysis, thermodynamics and fluid mechanics, engineering mathematics, control and automation.

Leaving Certificate | Coola Post Primary School, Rivertown, Ireland — 513 points

2018 – 2024

TECHNICAL SKILLS

CAD & Design: CATIA V5 (Proficient), SolidWorks (Proficient), Fusion 360, Siemens NX (self-taught modelling), AutoCAD

Simulation & Analysis: ANSYS and Abaqus (structural FEA — strength/stiffness), motion analysis, MATLAB/Simulink, NI Multisim (circuit simulation), Fluid SIM (hydraulics/pneumatics)

Computing: Python, C++, HTML/CSS, Linux (Red Hat) server setup and administration, Linux command line, Microsoft 365/Office

Prototyping & Fabrication: FDM and resin (SLA) 3D printing (own printers; daily industrial use), laser cutting, iterative prototyping, tooling and test-fixture building

Electronics & Instrumentation: Soldering and electrical crimping, multimeter diagnostics and fault-finding, wiring and circuit troubleshooting, Arduino-based actuator and sensor control, LiDAR sensor integration

Engineering Practice: Technical and manufacturing drawings, GD&T, bill of materials (BOM) preparation, technical documentation, defect inspection and quality records

PROJECTS

Filament Spool Re-Wind Machine — 1st Place, ATU Sligo Year 2 Engineering Expo

- Designed the complete mechanical system — worm gear, segmented gear reciprocating mechanism, spring-loaded tension control — in SolidWorks.
- Built and iterated the prototype across multiple versions using FDM 3D printing and laser cutting.
- Validated printed gears and a cantilever shaft assembly with structural FEA in ANSYS before finalising the design.

Autonomous Vehicle Prototype — Team Leader

- Led a student team designing and building an autonomous prototype, integrating LiDAR and other sensors with Arduino-based control for navigation and obstacle detection.

Robotic Arm and RC Car — Ongoing Personal Projects

- Building an Arduino-based robotic arm and an RC car independently, handling mechanical design, wiring, actuator control, and electronics integration.

Formula Student Chassis Design

- Designed and structurally analysed a tubular space-frame chassis in SolidWorks and Abaqus, validating strength and stiffness under load.

Differential Gearbox Motion Analysis

- Designed and assembled a differential gearbox in SolidWorks and ran motion analysis to evaluate operational behaviour.

EXPERIENCE

Engineering Summer Intern | Abbott, Sligo, Ireland

Jun 2026 – Present

- Create and update 3D CAD models of mechanical parts and machine components in SolidWorks.
- Produce engineering drawings, machine drafts, and technical documentation to support design work.
- Set up and administer Linux (Red Hat) servers supporting camera vision systems.
- 3D print prototypes and components to support design and production engineering work.
- Prepare bills of materials (BOM) for procurement; develop concept layouts in AutoCAD.
- Conduct inventory counts and Excel-based data analysis supporting cost-saving calculations.

Engineering Summer Intern | G.Bruss GmbH Dichtungstechnik, Sligo, Ireland

May 2025 – Aug 2025

- Set up plastic injection moulding machines and adjusted process parameters to meet specification.
- Inspected and sampled parts against defect criteria; monitored output to identify process deviations.
- Maintained quality and production documentation; performed routine maintenance and minor repairs.
- Worked night shifts in a high-pressure, fast-paced production environment.

Partner (Co-Owner, 50%) | balinMotors, Sligo, Ireland

Dec 2021 – Dec 2025

- Co-owned a motorbike import and servicing business; performed mechanical diagnostics, servicing, and inspections.
- Carried out electrical work including wiring
- Managed import logistics, customs clearance, and documentation.

Mechanical Technician Intern | Seamus McDaniel Motorcycles Ltd., Sligo, Ireland

Mar 2022

- Performed routine servicing, maintenance, and diagnostic inspections; maintained accurate service records.

Maintenance & Engineering Assistant Intern | G.Bruss GmbH Dichtungstechnik, Sligo, Ireland

Oct 2021

- Organised and tracked maintenance parts inventory for production machinery in support of the engineering team.

Earlier: Seasonal Shop Assistant, Dunnes Stores, Sligo (Dec 2021) — Merchandiser, Rabia Yasin & Sons, Sligo (Jun 2021 – Aug 2021)

CERTIFICATIONS

LinkedIn Learning: Introduction to Geometric Dimensioning and Tolerancing; SOLIDWORKS Advanced Simulation; SOLIDWORKS Design Study and Optimization; Learning SOLIDWORKS CAM; Learning Industrial Automation; Learning MATLAB; Python Data Analysis; Construction Management: Reading Drawings and Specifications; Supply Chain and Operations Careers

International Well Control Forum, Level 1 Programme

INTERESTS

Motorbikes and motocross riding; competed in the Ferrari Esports Challenge (2023); 3D printing, CAD modelling and 3D game design; programming and personal engineering projects.
